Seether

Seether

you're a blister on a finger,
and I'll keep you around, just to keep them around
So unexpected, you're sequestered
but you keep it alive, yeah just keep it inside againand then we'll follow you home again
and give the sickness we give to friends
and then we'll swallow you whole again
in my wide mouth, to prayjust let it fester, let it rest here
just pretend we're contrived
just pretend we're in bind
if we're rejected, we're expected
just to cling to the lie
and to keep it inside, yeahand then we'll follow you home again
and give the sickness we give to friends
and then we'll swallow you whole again
in my wide mouth, to prayif we find her, can we keep her
just as cold as we found her
just as old as a memory
if she flinches, seven inches
we'll just keep it alive
and just keep it inside, yeahand then we'll follow you whole again
and give the sickness we give to friends
and then we'll swallow you whole again
in my wide mouth, to pray
