Open Your Heart

Westlife

I didn't mean to let you down
You have to believe it
I don't know what went
through my mind
But now I can seeThat I waited too long
To tell you how much it matters
Just to be right here with you
But I couldn't think of anything better
I should have told you soBaby open your heart
Won't you give me a second chance
And I'll be here forever
Open your heart
Let me show you how much I care
And I will make you understand
If you open your heart
To love me once againI'll try to make it up to you
I want you to know (you have to know)
Baby I swear that I'll be true
And never let goIf I waited too long
To tell you how much it matters
Just to be right here with you
But I couldn't think of anything better
I should have told you soBaby open your heart
Won't you give me a second chance
And I'll be here forever
Open your heart
Let me show you how much I care
And I will make you understand
If you open your heart
To love me once againWe could relive this pain and sorrow
But we better do it in time
Start over here and save tomorrow
I wanna make you mineBaby open your heart
Won't you give me a second chance
And I'll be here forever
Open your heart
Let me show you how much I care
And I will make you understand
If you open your heart

To love me once againBaby open your heart
Won't you give me a second chance
And I'll be here forever
Open your heart
Let me show you how much I care
And I will make you understand
If you open your heart
To love me once again
