Forest

Number One Gun

As you take off your bandage
Ask yourself, if you are alright now
Take a brake from the world
And all the ones you love
Let it out as you yell it
Might as well 'cause you all alone
Name in vain while you at it feels so good

I've said a lot of things
I've done it all but not this
I've got to figure out
Why the world is so big

While you hide in the forest
You engage with the animals
Gathering all around you
It's what you wanted all along

To the secrets and knowledge
Ends opinion from all around
When the sky turns to water
You'll know what to do

I've said a lot of things
I've done it all but not this
I've got to figure out
Why the world is so big

I've got way, way out
Way out of bounds
Up to anything
Tell me how

I tell you to get by my side
I tell you to get by my side
I tell you to get by my side
I tell you to get by

I tell you to get by my side
I tell you to get by my side

I tell you to get by my side
I tell you to get by

I've said a lot of things
I've done it all but not this
I've got to figure out
Why the world is so big

I've said a lot of things
I've done it all but not this
I've got to figure out
Why the world is so big

I've got way, way out
Way out of bounds
Up to anything
Tell me how
