On the Bus

Evan & Jaron

You oughta know by now that I don't wait around
Drag my heels hold my breath and hang out underground
You think I think too much, I think we'll wait and see
From here to there I'll take a piece of all that's in betweenNever say never and don't wait forever
It's an open mind that sees that now is the time
To take a chance, take a shot, take control of the situation(Ooo)
I can't stand around here telling you
About the things I've done and what I got to do
So are you on the bus or not?
Cause we're leaving the stationDon't leave yourself behind and don't get in the way
(Tomorrow's coming fast to take away today)
Tomorrow's coming fast to take away today
You say I want too much, but I want you to see
That if you want to come with me, you're gonna to have to leaveNever say never and don't wait forever
It's an open mind that sees that now is the time
To take a chance, take a shot, take control of the situation(Ooo)
I can't stand around here telling you
About the things I've done and what I got to do
So are you on the bus or not?
Cause we're leaving the station
(Ooo)
Cause we're leaving the station
(Ooo)So are you on the bus?
(Ooo)
So are you on the bus or not?
(Ooo)
Cause we're leaving the station
(Ooo)You think I think too much, I think we'll wait and see
From here to there I'll take a piece of all that's in betweenNever say never and don't wait forever
It's an open mind that sees that now is the time
To take a chance, take a shot, take control of the situationI can't stand around here telling you
About the things I've done and what I gotta do
So are you on the bus or not?
Cause we're leaving the stationLeaving the station
