Same Drug

Cold

I bet you'd never come down from your tower for me
I'll let you take it real slow while I try to decide
Never would've loved you, should've left this town
Never would've loved you but everything got turned aroundIt's nothing much but the same drug
It's nothing much but the same drug, everyday
It's nothing much but the same drug
You threw it away but I gave love [Incomprehensible] awayShe didn't come from the same world, see the same things, I can't deny
I bled on stages to get here, sent screams up to the sky
Never would've loved you, should've left this town
Never would've loved you but everything got turned aroundIt's nothing much but the same drug
It's nothing much but the same drug, everyday
It's nothing much but the same drug
You threw it away but I gave love [Incomprehensible] awayShe did it all the way, now she's gone today
I can't sleep without her
She did it all the way, now she's gone today
I can't sleep without herIt's nothing much but the same drug
It's nothing much but the same drug, everyday
It's nothing much but the same drug
It's nothing much but the same drug, everydayIt's nothing much but the same drug
It's nothing much but the same drug, everyday
It's nothing much but the same drug
It's nothing much but the same drug, everyday
