Hope

AAGSF

You are a lighthouse when I'm lost at sea
You are the language that I'm trying to speak
And You are the taste that keeps me thirsting
You are the courage running through my veins
You are the compass pointing to a better way
And You are the whisper beckoning me
Hope is rising, hope is on the move
In the air and on the ground
In my head and all around, hope is rising
You are infectious, You're spreading through me
And You are the melody that I want to sing

And You are the tempo beating within my chest
Within my chest
Hope is rising, hope is on the move
In the air and on the ground
In my head and all around, hope is rising
It is rising, it is rising, it is rising up
It is rising, it is rising, it is rising up
Hope is on the move
Hope is rising, hope is on the move
In the air and on the ground
In my head and all around, hope is rising, is rising
Hope is rising
