Without You

Cold Flamez

[Chorus] x2
i rather be without you ,
[i rather be without you]
than be here with you while you do what you want to
[than be here with you while you do what you want to]
Yeahhh,YeahhhYeahhhhh[dash]
All my trust from crush to lust in you
you crush it inlove with a
chick that is inlove with the public
to bussin, fighting feeling like im lied too
i tried to be with you for life too
but you slide to the left to chill with your male friends
slide to the right and its back at me again
its CFC again remember the beginning
when i was the only men on my first song
i let you hear it, you replay
it's the worse song!
you didnt think i made the beat with the drumpbouz
i was just looking for support and motivation from my girlfriend is that you made me feel about the sew i made the world end
i was in the world when with a million other chicks
and i chose you
you supposed to be there to support me
like i had supported you
and now im here singin thiz to[Chorus] x2

on my side cuz im free like financilade
is not you is me
