

# I Don't Wanna Live

[Chris Cagle](#)

I know you said when I left I'd regret every word, every breath  
Every step, every minute without you but go do what you have to  
I know I said you were wrong I'd move on, it was only a matter of time  
'Til I'd make it without you but this wasn't about you I said I needed space, a change of place  
To go out and live my life But I don't wanna live without you anymore  
And what I wouldn't give to get us back to the way it was before  
I admit I was wrong all along, now you're gone with all that I've been livin' for  
And I don't wanna live without you anymore For a couple of nights I was fine, I was high on the wine and the  
lights  
And my new found freedom that I thought I needed  
But that cold lonely room that I headed home to, it felt like a tomb  
I just stared at the ceiling, what an empty feelin'  
And baby I apologize, tell me it's not too late, yeah 'Cause I don't wanna live without you anymore  
And what I wouldn't give to get us back to the way it was before  
I admit I was wrong all along, now you're gone with all that I've been livin' for  
And I don't wanna live without you anymore Oh baby, I don't wanna live without you anymore  
And what I wouldn't give to get us back to the way it was before  
I admit I was wrong all along, now you're gone with all that I've been livin' for  
And I don't wanna live without you anymore  
No, I don't wanna live without you anymore
