The Divinity Of Purpose

Hatebreed

When the odds were stacked against
I needed someone by my side
And when the world left no place for me
I needed someone by my sideAnd when the skies crashed down upon me
I looked for someone by my side
You were there when no one else was
You showed me whats born doesnt always dieYou showed me whats born doesnt always dieDivinity
The divinity of purpose
This is my divinity
The divinity of purposeFor the way into my thoughts
Ive always thought true outrage
Follow me with feet to edge
And help me step away
Follow me with just a whisper left
And turning into screams
Like giving on my weakest stage
You helped me find the strengthWhen the odds were stacked against
I needed someone by my side
And when the world left no place for me
I needed someone by my sideAnd when the skies crashed down upon me
I looked for someone by my side
You were there when no one else was
You showed me whats born doesnt always dieNow its the divinity
The divinity of purposeI heard the message about the scourge
And at least youre hanging with me
Felt the pain of discipline
Whats worse than doubt of regret?
Left me with foot full to climb
When the purpose showed is face
I gave it on my weakest days
You helped me find the strifeWhen the odds were stacked against
I needed someone by my side
And when the world left no place for me
I needed someone by my sideAnd when the skies crashed down upon me
I looked for someone by my side
You were there when no one else was
You showed me whats born doesnt always dieDivinity
The divinity of purpose
This is my divinity

The divinity of purpose
