One More Morning

Steve Winwood

In the sky, light is coming
So glad we all have this day
We all want one more morning
Just to know the night won't stay
Lift my eyes to the dawning
To see the life start again
Just to see one more morning
Just to feel it all begin
Just to have this day and life starting all over
For all it may bring
A blessing on everything
And one more song I can sing
One more day, one more memory

One more link in the chain
We all want one more morning
Just to feel it all again
Just to have this day and life starting all over
For all it may bring
A blessing on everything
And one more, one more song I can sing
In the arms, we were born in
In the arms that will take us home
We all want one more morning
Then we'll take the night to come
Then we'll take the night to come
