Me And You

Duane Loken

I won't tell you what to do
No need to tell you what we've been through
I am speaking from my heart tonight
Maybe this time I will get it right
And darling this is true
It's me and you
I remember when times were bad
You were the best friend I ever had
You where always by my side it's true
There was no place I could hide my blues

Still we made it through
Just me and you
Hold me it's now or never
Hold me I'm gonna love you beyond forever
I am speaking from my heart tonight
Maybe this time I will get it right
Cause darling this is true
It's me and you
It's me and you
