Point of View

DarkSunn

Think of all the people who have missed the chance to fall in love
And stand for something right
And now think of all the people who have let it slip away
When they really should've held on tight
All the missed opportunity
That will never be me
There's a dream I have
And I cant go back home
Empty handed
Are they ready for my point of view
Future's open wide
Nothings blocking my way yea
Its a miracle and its comming true
This is how it looks from my point of view
Many moons ago I made a promise to myself
That I would have to make it on my own
I would drive the train fly the plane make a crazy world seem sane
Destination unknown

Always going against the tide
No other way would be right
There's a dream I have
And I cant go back home
Empty handed
Are they ready for my point of view
Future's open wide
Nothings blocking my way yea
Its a miracle and its comming true
This is how it looks from my point of view
There's a dream I have
And I cant go back home
Empty handed
Are they ready for my point of view
Future's open wide
Nothings blocking my way yea
Its a miracle and its comming true
This is how it looks from my point of view
