How Lucky We Are

Douwe Bob

We got the upper hand
A random set of cards
Try and see my friend
How lucky we are
You got your big eyes fixed
On the rearview mirror
I say we look ahead
To see how lucky we areAnd it's a strange life
It's a great rideThere's a light you don't see
You're the light that shines on me
We got everything we need
To make this workWe live a long, long time
And feel life is short
We got all we need
And yet we still want more
We got the upper hand
A random set of people
Such very close friends
How lucky we areAnd it's a strange life
It's a great rideThere's a light that you don't see
You're the light that shines on me
We got everything we need
To make this workOh, we got all
Oh, we got all we needThere's a light that you don't see
You're the light that shines on me
We got everything we need
To make this workThere's a light that you don't see
You're the light that shines on me
We got everything we need
To make this work
