Procession

New Order

There is no end to this
I have seen your face
But I dont recognize all these things
You must have left behindIts a problem, you know
Thats been there all your life
I try to make you see the world without a view
That just turn black and whiteAt night, it gets cold and
Youd dearly like to turn away
The escape that fills
Makes you want to turn on heel
Alone, alone, alone, aloneThere is no end to this
I cant turn away
Another picture but the scene
Its still the sameThere is no room to move
Or try to look away
Remember, life is strange
Life keeps getting stranger every dayI try so hard but this attitude's
A type that wont subside
No matter what they say
Remember, heart beats you, late at nightYour heart beats you, late at night
Your heart beats you, late at night
Your heart beats you, late at night
