Louder (Electromix)

IV

Life is like a pulse that's leading the way.
Our heads are in the light we live by the day.
Our heart is beating louder than the sound of these drums.
We're going louder, now we're going louder.Stop now, feel alive, going on until the world collides.
A Skyline out of sight, all your dreams are black and white.
Stop now, share the light pass it on until we fill the night.
Say drink up feel alive time to stop yeah.I'm not fading out we're living by the day.
You're brighter in the dark racing with the clock.
Yeah I'm not fading out we're rising up again.
You're opening up and I can grow on your side.
I don't know if you know...Life is like a pulse that's leading the way.
Our heads are in the light we live by the day.
Our heart is beating louder than the sound of these drums.
We're going louder, now we're going louder.Fast lane, overtake, picking up speed of sound we break.
When day and night overlap sound and light are black and white.
Time flies, share the night work it out 'till you feel the life.
Say drink up, feel alive time has come to stop yeah.I'm not fading out we're living by the day.
You're brighter in the dark racing with the clock.
Yeah I'm not fading out we're rising up again.
You're opening up and I can grow on your side.
I don't know if you know...Life is like a pulse that's leading the way.
Our heads are in the light we live by the day.
Our heart is beating louder than the sound of these drums.
We're going louder, now we're going louder.
