Bad Dream

Martin & James

I feel like I've been watching
The stars and Earth collide
The past, it haunts me
Yeah it kills me every single time
And now my mind is racing
My heart pounds in my chest
I know I have to let you go
Cause I just can't forget

I'm so in love but I found your lies
Tell me I'm having just a bad dream tonight
Tell me love, that it's all alright
Tell me I'm having just a bad dream tonight
Come wake me up [5x]

I wish I never knew what
I somehow figured out
Lie and tell me you don't know
What I'm talking about
How do I recover
From these pictures in my head?
You were the love of my life
I sure hope she was worth it
