

Now the Action Is on Fire!

[Biffy Clyro](#)

I'm cagey about stories involving time, it's like I'm slowly burning, breathing crimes
This is all right, burn the action now, tell me how you feel, burn the action now
Rotations take hold, clear but filthy cries
This is all right, burn the action now, tell me how you feel,
burn the action now...this is all right, all right
When the inner energy pollutes my soul with selfish needs
and small conspiracies unique from loyalty
And over and over and over and over and take all I have
and under and under and under and under and
Could you make it any easier so we can set this on fire
This is all I have and over and over and over and over and, take all I have
And under and under and under and under and
And over and over and over and over and take all I have to decide and all I have
We'll change the world how we want to, we'll change the world inside you
You changed the world, you changed the world,
burn the action, burn the action, burn the action now!
