Love Will Never End

Hear'say

When you're down and you're lonely
You know that I will be there
Even though we've been around the world
Away from you
Just close your eyes
Dreams will come true
This love is now and forever
I found a way to your heart
Through the sunshine and the rainy days
This much is true
Remember
We love you
Join hands - let go
Set the world on fire
You can believe that
Love will take you higher
I swear you'll never be the same

Cause this kind of love never ends
From all of us to all of you
Just close your eyes
And let your dreams come true
Join hands - let go
Set the world on fire
You can believe that
Love will take you higher
I swear you'll never be the same
Cause this kind of love never ends
Join hands - let go
Set the world on fire
You can believe that
Love will take you higher
I swear you'll never be the same
Cause this kind of love never ends
