Nuclear

Destiny's Child

You had your dreams,
And I had mine.
Eyes wide open and we dream,
You wanna know how we kept our s**t together.
And I'm wondering,
It's just evolution,
We're just getting better,
When the two become one,
On a quantum level.It's nuclear, with you here
There's no where left to run, why run
Why would you run?
It's nuclear, with you here
We're both here. AhBlow it all away, eh, eh
Blow it all away, eh,eh
Blow it all away, eh, eh
Blow it all away.You had your half, and I had mine.
And now there's no such thing as you and me.
I was so used to feeling incomplete.
And I'm wondering, It's just evolution
We're just getting better,
When the two become one,
On a quantum level.Repeat chorusBlow it all away,
In a time where galaxy's change between us,
We share a bond that can't restrain hat can't be touched,
So amazing superpower takes over,
I never lose the energy.Repeat chorusBlow it all away, eh, eh
Blow it all away, eh, eh
Blow it all away, eh, eh
Blow it all away, eh, eh
