How Many

Bonnie Owens

If all the girls you ever knew were standing here in front of you
I wonder how many there would be
If all the girls you ever kissed were put on paper in a list
I wonder how many there would be
You must've kissed a million for everywhere we go
You seem so well acquainted the way they smile and say hello
If I could count their broken hearts and add my own if we should part
I wonder how many there would be
[piano - steel]
You must've kissed a million...
I wonder just how many there would be
