Right Direction

Devon Williams

Standin' on this dusty road
Listenin' to my radio
If you could see me, I know you'd swear
I'm a thousand miles from anywhere
Well, it may seem stone insane to you, baby
But I guess it's just what I gotta do
Just to get myself to where you are
Don't you know I traveled many times as far?
Well, I hope I'm headed in the right direction
Got no time for makin' wrong decisions
What could give me such a sense of mission?
Only love, could've brought me here
In the right direction
Well, it takes a strong and a mighty wind
To send me all places I've been
It takes more than one or tells the tale, baby
Searchin' for some Holy Grail
And I, hope I'm headed in the right direction
Got no time for makin' wrong decisions
What could give me such a sense of mission?
Only love, could've brought me here
Everybody knows that love will make you crazy
Make you play the fool it's so intoxicating
So don't you be surprised if one lazy afternoon
I come knockin' on your door, baby
'Cause you know I'm hot on you
Well, I may not pass this way again
And if I do, I don't know when
But it seems to me, unless I'm wrong, baby
Our paths will cross before too long
Well, I hope I'm headed in the right direction
Got no time for makin' wrong decisions
What could give me such a sense of mission?
Only love, should've brought me here
Hope I'm headed in the right direction
Got no time for makin' wrong decisions
What could give me such a sense of mission?
Only love, could've brought me here
Hope I'm headed in the right direction

Got no time for makin' wrong decisions
What could give me such a sense of mission?
Only love, only love can set me off in the right direction
