Running in Circles

POP ETC

Every time I run, every time I run
Where do I end up?
Back at the start, staring back at you
Right where we left offBut the harder I am pushed
The easier it gets to forget
All the reasons why I could never find
The words to explain thisOh, we came so close
It felt so close we could taste it
But there's nothing left to do
There's nothing we can do if we face itIt's part of me
It's part of you, but it's wasted
No, there's nothing left to do
There's nothing we can do to replace itNow I'm running in circles without you
I'm running in circles without you
I'm running in circles without you
I'm running in circles without youI can see your eyes, I can see your eyes
Looking for new life
Where there once was a heart, some kind of beat
Now is it complete?No matter how many times
I tell myself it was right
Every day I know I can only play
This way to lose the fightOh, we came so close
It felt so close we could taste it
But there's nothing left to do
There's nothing we can do if we face itIt's part of me
It's part of you, but it's wasted
No, there's nothing left to do
There's nothing we can do to replace itNow I'm running in circles without you
I'm running in circles without you
I'm running in circles without you
I'm running in circles without youI'm running in circles without you
I'm running in circles without you
I'm running in circles without you
I'm running in circles without you
