Astronauts

Modern Skirts

We can float and startle from our sleep
The only light that we can find reflecting off of satellites
Keeps up in our right minds, dont push it away
You need it every night and every dayYou should know that when I go to sleep
Of all the things I leave behind, I want to die and leave my teeth
So you can keep a bright smile if it helps you to grieve
You need it every day of every weekIf theres gonna be a fight, Im ready
You should never tell me how I ought to be
I miss you, hope you stayIf theres gonna be a fight, Im ready
You should never tell me how I ought to be
I miss you, hope you stayYou whisper to me sweetly,
not everyones completely desperate for love
I gave it upIf theres gonna be a fight, Im ready
You should never tell me how I ought to be
I miss you, hope you stay
