Star

Earth, Wind And Fire

Walkin' alone at night in the cold rain
Wonderin' if I will see you again in some corner light
Runnin' down the road in the warm sun
Dreaming that I am still the one resting by your side
You took the road to fortune and fame
Your name in lights
I want you to know I still feel the same
Star, I still love you, I still love you
Remembering when you played me that first song
The first show that you asked me along, just to be around
Workin' so hard till you got that first break
You said you could turn them around, give them something new
You took the road to fortune and fame
Your name in lights
I want you to know I still feel the same
Star, I still love you, I still love you
Got that photograph of you and me
I hear your voice on my radio
Will I ever lay with you again?
Nobody planned it, we just seemed to drift now
I always seem to have to leave just as you come around
But someday soon, girl, I just gotta see you
I just gotta find out if we still have time
And you took the road to fortune and fame
Your name in lights
I want you to know I still feel the same
Star, I still love you, I still love you
Got that photograph of you and me
I hear your voice on my radio
Will I ever lay with you again?
