Archangel

Rick Springfield

Angel, just tell me that you'll never leave, understand
Though I know it can't always be the way we planned
I don't think about tomorrow, I just thank God you're my angel
Angel, you saved my life and I was suddenly free, I don't know
How you came like an archangel, but now it's just you and me
I was running scared for much too long till you put me back on straight
Archangel, God knows what I'd do without you my angel
Never leave me, always love me like an angel, archangel

Tears drop like diamonds from your golden eyes
Weep for me archangel and wash away the lies
I've run with demons much too long, now take me to your breast, angel
I've been without you much too long, now I thank God you're mine
Archangel, God knows what I'd do without you my angel
Never leave me, always love me like an angel, archangel
Archangel, archangel, archangel
