The Greatest Hits By God

Quest For Fire

Orion sky and the Hunter hiding
Better move if we want to make it home
Come on let's go
Turning seasons, the pull of reason
Running howl to the void that's made of stone
Come on let's go

If we don't know if we have been here before
If we don't know which way to take the road
Then we are lost in ways we've never known

Canus Major, a friend in danger
Better move if you want to ever know
Abyss of stones

Constellation starry stations
Radio plays the greatest hits by God.
And never stops

If we don't know if we have been here before
If we don't know which way to take the road
Then we are lost in ways we've never known
