One In a Million

Judith Owen

Old friend
What you been doing with your life then?
With all of those plans you figured out since when
Back in those high school days?
So now you've come clean
How much you've struggled for that one dream
Chasing your rainbow wasn't what it seemed and
It didn't all go your wayAnd you hurt, when others were growing
Tiy still pale, when others are glowing
You feel stale just watching your gossip TV
Believe me...Don't live looking out on the other side
Don't live thinking everybody's got it easier
Even if the grass looks greener
Where they're standing, you know
Yoiu're one in a million, so go...
Go out and live your lifeSo you're a big joke
The way you've been moving like a slow-poke
Your glass isn't empty, it's just plain half broke and
You're starting to fade away
'Cause you're in a landslide
Crumbling slowely on the inside
Riding it bare back, 'cause you've got your pride
And they'll never see you swayBut each day, somebody's winning
And it makes you feel like you're only beginning so....Don't live looking out on the other side
Don't live thinking everybody's got it easier
Even if the grass looks greener
Where they're standing, you know
Yoiu're one in a million, so go...
Go out and live your lifeDon't live looking out on the other side
Don't live thinking everybody's got it easier
Even if the grass looks greener
Where they're standing, you know
You're one in a million, so go ....
Go out and live your own life
You're one in a million, so go ....
Go out and live your own life
