I Would Have Loved You All Night Long

Keith Whitley

I know she thinks we're different
In the cold gray light of dawn
For somethings feel so right at night
And in the morning feels so wrongLast night I saw me in your eyes
This morning I see I'm gone
If I'd known last night was our last night
I would have loved you all night longIf I'd known last night was the last night
No more to look forward to
I would have given more me
And taken more of youThen perhaps instead of lettin' go
You'd still be hangin' on
If I'd known last night was our last night
I would have loved you all night longI watch you brushing your soft black hair
And the wrinkles from your clothes
As you move around the ring
I wished you wouldn't goIf I could love you one more time
I'd give anything I owned
If I'd known last night was our last night
I would have loved you all night longIf I'd known last night was the last night
No more to look forward to
I would have given more me
And taken more of youThen perhaps instead of lettin' go
You'd still be hangin' on
If I'd known last night was our last night
I would have loved you all night longIf I'd known last night was our last night
I would have loved you all night long
