Love the World Away

Jimi Jamison

I spent nights long nights
Living in a world gone mad
Walking down a street come back
In the desperate moonlight

Dreams gone south
People living hand to mouth
Living in a place called out
Never having a real life

In your arms
I found a secret hiding place
In your eyes
I see the light of our escape

We can't hear the silence
Screaming in the streets
Can't see the stormclouds
Building in the big city heat
It could be Armageddon
Seven stories below
When it all comes down
It's in your arms I'll stay

We'll love the world
Love the world away

I said love sweet love
The only thing i know for sure
I finally found the perfect cure
The rhyme and the reason

I said move along with me
Through this crazy world we see
We'll make a little history
A heart for all seasons

Slow down
Why keep up with this frantic base
I swear

Above the store we'll find some space

We can't hear the silence
Screaming in the streets
Can't see the stormclouds
Building in the big city heat
It could be Armageddon
Seven stories below
When it all comes down
It's in your arms I'll stay

We'll love the world
Love the world away

In our little corner of paradise
We'll leave it all behind us
No one's gonna find us

In our little corner of paradise
Cut off from the world we know

Life's so amazing we'll live it twice
In our little corner of paradise

Paradise

We can't hear the silence
Screaming in the streets
Can't see the stormclouds
Building in the big city heat
It could be Armageddon
Seven stories below
When it all comes down
It's in your arms I'll stay

We'll love the world
Love the world away

We'll love the world

Love it away
Love it away
Love it away
Love it away

Love the world away

We're gonna love the world
Love the world away
