Just This Way

Bomshel

It's the smell of your skin
When you just come in
From in the yardIt's the taste of your lips
When you kiss me
You know you've got my heartThis dandelion necklace
That's hanging on the wall
From the night that you told me
That you were fallinOur love is just this way
Pure and simple, built on faith
You and I just feel so right
It's paradise, it's paradise
Our love is just this way
It's what we do and its what we made
Maybe we been changed but our love will stay
Just this wayThere's us dancing in the kitchen
And you sing off key to the radio
And baby I'm your biggest fan
With you and your wooden spoon microphoneOh we don't need the money
Honey we don't need the fame
Yeah we got each other
At the end of the dayOur love is just this way
Pure and simple, built on faith
You and I just feel so right
It's paradise, it's paradise
Our love is just this way
It's what we do and its what we made
Maybe we been changed but our love will stay
Just this wayAll these fairytales
Ain't got nothing on us
We're as real as it gets and
As true as its comesOur love is just this way
Pure and simple, built on faith
You and I just feel so right
It's paradise, it's paradise
Our love is just this way
It's what we do and its what we made
Maybe we been changed but our love will stay
Just this wayJust this way
