Sugar In the Engine

Hawthorne Heights

There's sugar in the engine
I feel the friction and tension here
Sprinkle some on the engine
It's been such a controversial year
We're such a conversation pleaseLook closely
Life isn't what it seems sometimes
Act lonely
And just hope one day you'll feel aliveThere's smoke all around the ceiling
I get the feeling that no one's safe
Let's concentrate on our healing
Gather round, you know it's worth the waitLook closely
Life isn't what it seems sometimes
Act lonely
And just hope one day, you'll feel aliveClose your eyes and make a wish
You'll need more than a crucifix to survive
I know I'll never make your list
I just hope one day, I'll feel aliveOne day I'll feel alive
One day I'll feel alive
One day I'll feel aliveLook closely
Life isn't what it seems sometimes
Act lonely
And just hope one day, you'll feel aliveClose your eyes and make a wish
You'll need more than a crucifix to survive
I know I'll never make your list
I just hope one day, I'll feel aliveClose your eyes and make a wish
You'll need more than a crucifix to survive
I know I'll never make your list
I just hope one day, I'll feel aliveNovember 24th, I woke up just like any other day
The beginning of another tour
Just another city I've already seen before
If I only knew last night was the last time
I would ever see you againI would've said good night
I would've said I love you
I would've said good byeI would've said good night
I would've said I love you
I would've said good byeI would've said good night
I would've said I love you
I would've said good bye
...
