Operation

Relient K

Take me to a hospital
cause there's too much blood lost to tell
If I'll make it out alive,
My body's got a war insideThe foxy nurse, I talked to her
Is getting a new doctor
Someone who cares about me makes sense
Someone with patience for his patientsI need an operation, oh Lord please operate
I need an operation, remove the pride and extract the hate
Bring the color back into my cheeks
Because my flesh is strong and my spirit's weakI need a room for this emergency
The ER would suit me perfectly
With tubes and needles stuck into me
I'm on a non poisonous IV
