Northern Lights

SKYWLKR

[Intro:]I am a knight of the light
Light of my mind and of heart
Together we hold much might
We can never be broken apart
[Verse:]So what are we doing?
What are we waiting for?
Get into the music
Let?s get into the temple
What you want is some no shit
Got me stuck in the symbol
Positions of movement
Less as your potential
[Bridge:]Love is on our tongues, boy can?t you taste it?
Ride among the stars, don?t need a spaceship
Empty all your love, boy I?m all wasted
Smoke you right on up, let?s take a space strip
[Chorus:]I can take you to the northern lights
I can take you to the northern lights
I can take you to the northern lights
I can take you to the northern lights
[Verse:]Enough with the small talk
Just turn it all off
Went down the spots between, we gon create our race oh oh
Placed into the nightfall
May come in a shadow

Tonight all the stars in heaven are waving a finger
[Bridge:]Love is on our tongues, boy can?t you taste it?
Tonight up on the shines, don?t need to chase her
I want all your love, swear I?m all wasted
Smoke you right on up, let?s take a space strip
[Chorus:]I can take you to the northern lights
I can take you to the northern lights
I can take you to the northern lights
I can take you to the northern lights
[Interlude:]I can take you, I can take you
I can take you to the northern lights
I can take you, I can take you
I can take you to the northern lights

[Chorus:]I can take you to the northern lights
I can take you to the northern lights
I can take you to the northern lights
I can take you to the northern lights
I can take you, I can take you
I can take you to the northern lights
I can take you, I can take you
I can take you to the northern lights
I can take you, I can take you
I can take you to the northern lights
I can take you, I can take you
Let me take you to the northern lights
