

# Crazy Nights

## Tesla

From the moment I walked in the room  
I knew what I was in for  
Soft music, the smell of perfume  
And that lacy little thing that you wore  
And by the way you're lookin' at me  
It's lookin' like it's gonna be one of those crazy nights  
One of those going out of our mind times  
You always make it worth the wait  
Baby, I've been going crazy all day  
For one of those crazy nights  
The moon is makin' shadows on the wall  
Something in the air is calling  
There's no need to say anything at all  
Our hearts are doing all the talkin'  
You make me feel so wild and free  
I think I'd lose my sanity without those crazy nights  
One of those going out of our mind times  
You always make it worth the wait  
Baby, I've been going crazy all day  
For one of those crazy nights  
One of those crazy nights  
One of those going out of our mind times  
You always make it worth the wait  
Baby, I've been going crazy all day  
For one of those crazy nights  
One of those crazy nights  
One of those crazy nights
