Each Other

Oliver Morgenroth

No more lonely nights to hurt me
No more tears left to spare
No more reasons to be unhappy
You threw them all up in the air
And I don't know how you did it
But you made me a believer
I never thought that love
Could turn someone into a dreamer
For the first time in my life
I don't feel like I need a breather
'Cause everywhere I go
I wanna know you're gonna be there
I'd give it all up for you
Do anything you asked me to
You're like a pillow I can hold on to
'Cause we got each other, we got each other
Now that this has gone away
You left me here without a trace
And now I'm in a brand new place
'Cause we got each other, we got each other, yeah
And some times in the past almost pulled us under
But we got through all that and it made us stronger
Through the good, through the bad, you just ain't another
You're the best thing I have and we got each other
When the hard times confront me
You always show me that you care
And I believe you are my rescue
When I see you right there
And I don't know how you did it
But you made me a believer
I never thought that love
Could turn someone into a dreamer
For the first time in my life
I don't need a breather
'Cause everywhere I go
I wanna know you're gonna be there
I'd give it all up for you
Do anything you asked me to
You're like a pillow I can hold on to

'Cause we got each other, baby, we got each other
Now that this has gone away
You left me here without a trace
And now I'm in a brand new place
'Cause we got each other, we got each other
You are the hand that I reach for
When I don't wanna be alone
You are the voice I hear at night
Lets me know I'll be alright
When I need a real good friend
Don't have to look far, you're the best
I'm safe here in your arms
And I know this is where I belong
'Cause I'd give it all up for you
Do anything you asked me to
You're like a pillow I can hold on to
'Cause we got each other, baby, we got each other
Now that this has gone away
You left me here without a trace
And now I'm in a brand new place
'Cause we got each other, baby, we got each other
No matter what happens we got each other
Had some times in the past but we got each other
Through the good, through the bad we still got each other
Really happy or sad but we got each other
I'd give it all up for you
Do anything you asked me to
You're like a pillow I can hold on to
'Cause we got each other, we got each other
Now that this has gone away
You left me here without a trace
And now I'm in a brand new place
'Cause we got each other, baby, we got each other
And some times in the past almost pulled us under
But we got through all that and it made us stronger
Through the good, through the bad, you just ain't another
You're the best thing I have and we got each other
No matter what happens we got each other
Had some times in the past but we got each other
