Tonight's Your Night

New Edition

Here we are, just the two of us
Holding on to precious romance
Locked away in another world
There's nothing wrong when love is with usSometimes it makes me wonder
If anybody understands
How it feels to be so ready for love, girl
Now that you're with meTonight's your night
I want you to feel the power of our love
Tonight's your night
No one can stop us nowWhen we met, I might have known
No matter what you'd be my first love
Now this feeling sure has grown
Into so much more than I dreamed ofThis night was made for magic
We can't let go of what we feel
This one's ours alone
This time baby, all our ownTonight's your night
I want you to feel the power of our love
Tonight's your night
No one can stop us nowThis night we will remember
Baby, all of our livesOur time has come, the night has arrived
So that means all games must be put aside
The magic is here and it's coming on strong
And then nothing can stop us nowSometimes it makes me wonder
If anybody understands
How it feels to be so ready for love, girl
Now that you're with meTonight's your night
I want you to feel the power of our love
Tonight's your night
No one can stop us nowTonight's your night
I want you to feel the power of our love
Tonight's your night
