One Word

Kelly Osbourne

One word breaks the code of silence
Silence tells me all I need to know
One word, one word
Tells me everything I need to know
One world, driven into madness
Madness driven by the depths below
One word, one word
Tells me everything I need to know
It's not the way that I want it
It's just the way that I need it, day after day
It's not the way that I want it
It's just the way that I need it, day after day
One lie tells a thousand stories
The greatest stories that were ever told
One lie, one lie
Tells the greatest stories ever told
One man can predict the future
A future journey into outer space
One man, one man
A future journey into outer space

It's not the way that I want it
It's just the way that I need it, day after day
It's not the way that I want it
It's just the way that I need it, day after day
It's not the way that I want it
It's just the way that I need it, day after day
It's not the way that I want it
It's just the way that I need it, day after day
It's not the way that I want it
It's just the way that I need it, day after day
It's not the way that I want it
It's just the way that I need it, day after day
It's not the way that I want it
It's just the way that I need it, day after day
(One word, one word)
It's not the way that I want it
It's just the way that I need it, day after day
(One word, one word)
