Nathaniel

Jimmy D. Lane and Bev Butler Lane

Go and find him
'cause this may be the only chance you have to
To redefine him
And mold him into something that you find beautiful
And ever since Ive been here
Youve done nothing but
Hold him down and make him live in this world
That you have some how created
What about him?
Its just about the time they sit you down
They run the sickness through your mind
They tell you everythings gonna be just find until...
Its just about the time they sit you down
They run the sickness through your mind
They tell you everythings gonna be just find until...Then
Go and rescue him
'cause this may be the only chance you have to
To redefine him
And mold him into something that you find beautiful
And ever since Ive been here
Youve done nothing but
Hold him down and make him live in your life
(youve done nothing)
What about him?
Its just about the time they sit you down
They run the sickness through your mind
They tell you everythings gonna be just find until...
Its just about the time they sit you down
They run the sickness through your mind
They tell you everythings gonna be just find until...
And oh

Im getting better
Im better with you
And oh
Im getting better
With or without you
And oh
Im getting better

Im better now that i have seen those things you hide from me
What about him?
What about you?
Its just about the time they sit you down
They run the sickness through your mind
They tell you everythings gonna be just find until...
Its just about the time they sit you down
They run the sickness through your mind
They tell you everythings gonna be just find until...
And oh
Im getting better
Im better with you
And oh
Im getting better
With or without you
And oh
Im getting better
Im better now that i have seen those things you hide from me
Repeat 2x
They run the sickness through your mind.
