

# Wrong Side of Town

## Bbm

You've heard it said, I taught the bird to fly  
One kiss from me and some can't say goodbye  
The place you'll find me when the sun goes down  
After hours, on the wrong side of town How many faces will I change today?  
Take them to places where the shadows play  
That's where you'll find me when the sun goes down  
After hours, on the wrong side of town Lulled by the promise of a broken dream  
They all come looking for the answers  
The question's never if and when they fall from grace  
After all, it's just a matter of time Here comes another with a life to spare  
So young and innocent, but I know that stare  
Just whistle Parker's mood and I'll be there  
After hours, on the wrong side of town
