# Watch Me Work

## Melanie Fiona

Sick of boarding every place you wanna scream and shout
Feeling like its time to change, get a little wild
Come up from behind the shade, be the rebel child
Gonna race them hell tonight
Cause its alright, for you to be afraid
Theres a spotlight, thats shining just for you
Go the distance,lets show them what we're really made of
[Chorus]
Watch me work, something different, something new
Watch me work, out the box, out the blue
Watch me work, something sexy, something fine
Watch me work, out the box, blow your mind
Watch me work
Set the status quo gonna replace, let them other burn
Show them that youre here to stay, tell them watch and learn
Time to put the wheels in motion, never to return
Get on with myself tonight
Cause its alright, for you to be afraid
Theres a spotlight, thats shining just for you
Go the distance,lets show them what we're really made of
[Chorus]
Watch me work, something different, something new
Watch me work, out the box, out the blue
Watch me work, something sexy, something fine
Watch me work, out the box, blow your mind
Watch me work
Time to break free from these chains
Im on a mission, wanna live my life today
I thought I told you, Im taking over
Talk its cheap so its back to if I should work
[Chorus]
Watch me work, something different, something new
Watch me work, out the box, out the blue
Watch me work, something sexy, something fine
Watch me work, out the box, blow your mind
Watch me work X 2
