Love In Stereo

Sky Ferreira

She feelin' me though your girlfriend tellin' me you're ready to go
On the floor to get my attention she dropped it low
She was so seductive, I'd pay a fee if she'd let me touch it
I'm outta my mind the way she looked into my eyesShe said if you wanna break it down, if you wanna break it down
We can break it on down right here
If you wanna break it down, if you wanna break it down
We can break it on down right hereI said if you wanna break it down, if you wanna break it down
We can break it on down right here
If you wanna break it down, if you wanna break it down
We can break it on down right hereStereo, we can make love in stereo
I need you both so we can make love in stereo
Stereo, we can make love in stereo
I need you both so we can make love in stereoIf you're feelin' me though I know a little place where we can go
Baby let me know if you need a private show
We can do whatever, you and her dressed in leather
What's on your mind? Tell me how to do that one more timeIf you wanna break it down, if you wanna break it down
We can break it on down right here
If you wanna break it down, if you wanna break it down
We can break it on down right hereShe said if you wanna break it down, if you wanna break it down
We can break it on down right here
If you wanna break it down, if you wanna break it down
We can break it on down right hereStereo, we can make love in stereo
I need you both so we can make love in stereo
Stereo, we can make love in stereo
I need you both so we can make love in stereoIf you wanna break it down, if you wanna break it down
We can break it on down right here
If you wanna break it down, if you wanna break it down
We can break it on down right hereIf you wanna break it down, if you wanna break it down
We can break it on down right here
If you wanna break it down, if you wanna break it down
We can break it on down right hereStereo, we can make love in stereo
I need you both so we can make love in stereo
Stereo, we can make love in stereo
I need you both so we can make love in stereoSo we can make love in stereo
So we can make love in stereo
So we can make love in stereo
So we can make love in stereo
