# Some Other World

## The Rembrandts

Where are you now? Is it some place warm and shining?
With somebody who sees beyond your silver lining
Tonight only my heart with you, tonight, mmm, tonight
The closest that I've been to free
And we were never meant to be
Some other place, some other world
Some other life, could you be mine?
Some other place, some other world
Some other life, could you be mine?
Just one day with you and my whole life changed forever
With you, I believed there existed something better and right
Caught in-between what's wrong and right, tonight
The closest that I've been to free
And we were never meant to be
Some other place, some other world
Some other life, could you be mine?
Some other place, some other world
Some other life, could you be mine?
Some other place, some other world
Some other life, could you be mine?
Some other place, some other world
Some other life, could you be mine?
Some other place, some other world
Some other life, could you be mine?
Some other place, some other world
Some other life, could you be mine?
Could you be mine? Could you be mine?
