In The City

White Lion

When you look toward the city
A monument to there
And as you walk through to the streets
The people looking scared
And there are parts of the city
Where a hand begins
Then the night time arise for his deadly sin
One place in the city where lights shines so pity
You think your life's on the trigger
You're saying I don't care
No, no, he don't care
He walks the street at night
What a lonely soul
With this guys by side he wonders
Why he's alone?
But oh, in the city when the sun goes down
The neon light goes on and he's on the prowl
The black sky in the city, the light shining through

When the sun goes down, they could be on to you
Oh, in the city
You live or die
In the city
Don't ask why
In the city
You stroll at night
In the city
Stand up and fight
Oh, in the city
You live or die
In the city
Don't ask why
In the city
You stroll at night
In the city
Stand up and fight
