May

Mark Phillips

We got to talking, on that day when we first met
My words were falling straight out of my chest.
Yea she's amazing, I never felt like this before..
She's playin games and I can't take it anymore
Chorus
Oh may I just can't figure you out, your what I dream about
you got me goin crazy and I hope you can feel every word that I say
Oh may I gotta figure you out before you start slippin away
Verse 2
Shes left met thinkin is she doin this for fun
but when she smiles well I know that she's the one
My pulse is racin and I just can't get enough
Oh should I chase it could I even call her bluff
Chorus
Oh may I just can't figure you out, your what I dream about
you got me goin crazy and I hope you can feel every word that I say
Oh may I gotta figure you out before you start slippin awayEveryday I can't stop thinkin about the words that you say
In nearly just about every way You do anything
And can you believe I'm sittin here desperately
Begging for you to see how much you mean to me..
Chorus
Oh may I just can't figure you out, your what I dream about
you got me goin crazy and I hope you can feel every word that I say
Oh may I gotta figure you out before you start slippin away
I gotta figure you out before you start slippin away
I gotta figure you out before you start slippin away
