# Pogo

## Digitalism

Yeah, pogo
Theres something in the air
Theres something in the air
Theres something in the airNow, where has it been?
I mean, the good old wild days
Became a bit too lame
Just take a look at my placeIts such a mess
But I'll be out of this space as soon as you tell me
Where the night is
You have to set upBring it on, forwardYeah, pogo
Theres something in the air, pogo
Theres something in the air, pogo
Theres something in the airIts been quite of a while since I could experience your brightness
Now, youve got a brighter smile and I think I'm going to like it
Talking about the better things, you know how to maximize
Everything around you will become super sizedYou have to set up
Away from what matters
And get it prepared
ForwardYeah, pogo
Theres something in the air, pogo
Theres something in the air, pogo
Theres something in the airYeah, pogo
Theres something in the air, pogo
Cause I've been dreaming we could be the fire for this night
Cant stopYou have to set up
We could get so wasted if you would have come
(Bring it on)
We could get so wasted if you would have come
(Forward)We could get so wasted if you would have come
(Can't stop)
We could get so wasted if you would have come
(You have to set up)We could get so wasted if you would have come
(Bring it on)
We could get so wasted if you would have come
(Forward)We could get so wasted if you would have come
(Can't stop)
We could get so wasted if you would have come
(You have to set up)
