10 Light Years Away

Scorpions

In a run down bed and breakfast
A room with a view, across the river
I tried to loos the claustrophobia
Opened up and find Utopia
There's no more denying
As my mind go flying
Ten light years away to save my soul
Ten light years away to change it all
Whatever it may take I gotta try again
Girl it's time to start over
Ten light years away
I'd been watching the reflection
Of a bamboo in the shade, when I saw her
A very hot day in Havana
In a midnight blue lagoon
I knew she was hiding
Ten light years away so take me home
Ten light years away to change it all
Help me find today It's been way too long
Girl it's time to start over
Ten light years away
There's no more denying
As my mind go flying
Ten light years away to save my soul
Ten light years away to change it all
Whatever it may take I gotta try again
Girl it's time to start over
Ten light years away so take me home
Ten light years away to change it all
Help me find today It's been way too long
Girl it's time to start over
Ten light years away
