

Big Love (Northern Lights DnB Remix)

True Tiger

The more you have, the more you have to lose

Empty hands are always free to grab onto

Oh, darkness lives in every single one of us

I'm not afraid of mine

'Cause nothing is impossible but everything is difficult sometimes[Chorus]

And it takes big love, big love

To get you through

It takes big love, big love Sometimes I forget the search can mean so much more than the things you find

Living in fast forward but we never get the chance to press rewind[Chorus]Ooh, big loveOh, darkness lives in

every single one of us

I'm not afraid of mine

'Cause nothing is impossible but everything is difficult sometimes[Chorus]Sometimes I forget the search can

mean so much more than the things you find

Living in fast forward but we never get the chance to press rewindIt takes big love,

and it takes big love

To get you..

To get you through
