# Floater

## Rudder

To my mistress the bridge, I don't feel well
I'll be leaving and you can't stop me
We've been carrying on too long
We've been carrying on too long, I'm sorry, but I'm gone
I've got a bad reputation to think about
I've been dirty
I've been wrong
Maybe someday they'll find that I've washed up
I'm stepping out to clear my head
I'm breathing in to fill my lungs
We're all dead, we're all dead
Farewell scenic highway overpass
It's better this way anyways
My lover the river makes a better soldier than a bride
My lover the river makes a better soldier than a bride
But I left my heart at the side of her bed
And she's got the warmest body that I've never had
Drag the lake, you'll find that it full of love
Drag the lake, you'll find that it full of love
Drag the lake, you'll find that it full of love
Bring the children to the water
And let them see what heartache did
This matrimony needs a witness
And you can teach them to swim
And you can teach them to swim
And you can teach them all to swim
Don't let your dreamers grow up to be dead men
Drown us at birth, save her some time
Drifting on romantic holiday
Breathless as her cold arms cover me
Drag the lake, you'll find it full of love
Drag the lake, you'll find it full of love
