Hermano

Ozone Mama

You know there ain't no time to falling 'to pieces
Only God knows how far it goes
Without you by my side I'm tumblin' and I'm rollin'
So put me down where the water is
To cool down, cool downTake me where the water runs deep, a deeper peaceful placeDown where I can feel no pain just calm and sane
Down to the place I can call my home
Down to a place no one has known and I wonder
Brother won't you call me by my nameYou said, you left to find yourself but I
Never got the chance to say good-bye
It feels that you're out of your head young man
Now you're alone to swim along so cool down, cool downI take you where the water runs deep, a deeper peaceful placeDown where you can feel no pain just calm and sane Down to the place you can call home
Down to a place no one has known and you might wonder
Brother will I call you by your name?[Solo]Take me where the water runs deep, a deeper peaceful place
I take you where the water runs deep, a deeper peaceful placeDown where I can feel no pain just calm and sane
Down to the place I can call my home
Down to a place no one has known and I wonder
Brother won't you call me by my nameDown, I take you
Down, I take you
Down to a place no one has known and I wonder
Brother won't you call me by my nameCool down... cool downKeep your head up high
Look for (some) peace of mine
Find your ways to get out
And leave all things behind
