

Under Stars

Aurora

My world beats outside our hearts
Times of need we are apart
Under stars we are alone
Under stars

Knuckles moves under your skin
Your arms has hives and drives it in
And they're moving all around
Until it cries
Under stars
Under stars

Mother cries and turns to ripe
Walks outside without a sign
The raining is on her skin
While she fazes every sin
Under stars
Under stars

They have only fallen asleep
They have only fallen asleep

I've seen it many time
Each time it blows their eyes
And take it while still bleeding
Give yourself a moment breathe

I've seen it many time
Each time it blows their eyes
And take it while still bleeding
Give yourself a moment breathe
Give yourself a moment breathe
Underneath the stars
